SUMMARY

Third-year B.Tech CSE (AI/ML) student with strong foundations in Data Structures Algorithms, Database Management and Data Analytics. **LeetCode Knight (1900+ rating)** with experience building AI-powered applications, Multi-agent systems and automation solutions. Proven leadership, collaboration, and communication skills through hackathon achievements, technical projects, and team-based initiative

EDUCATION

BTech Computer Science Engineering (AI / ML) September 2023 - August 2027
Galgotias University
CGPA: 8.9

SKILLS

Languages: Java, Python, HTML, CSS, JS
Core Fundamentals: DSA, OOP, DBMS
Tools/Platforms: Git/GitHub, HuggingFace, Unsloth, Docker, CrewAI, n8n
AI/ML Exposure: LLMs, Model Fine-Tuning
DataBase and APIs: MySQL, ResrAPI

PROJECTS

Millie - AI Blender, Mixamo, React, Ollama, UnSloth
Front-End Developer / Fine-tuning

- Developed an AI avatar platform enabling real-time voice and text interactions.
- Fine-tuned LLMs using Hugging Face and Unsloth to improve response quality and accuracy.
- Reduced response latency from 8s to 2s by implementing load balancing, significantly improving system responsiveness.
- Integrated realistic 3D avatars using Blender and Mixamo for immersive user interactions.

Autonomous Multi-Agent Orchestration System React, Groq
Frontend Developer, Technical Lead, System Architect Ongoing

- Designed AMOS, a multi-agent orchestration system that transforms high-level objectives into structured execution workflows.
- Developed Planner, Executor, and Validator agents for task planning, execution, and workflow validation.
- Built an interactive React dashboard to visualize agent interactions, execution progress, and approval checkpoints.
- Integrated Qwen, GPT-OSS, and Ollama models via the Groq API, and implemented a CI/CD pipeline for automated task execution and deployment.

INTERNSHIP

Data Analyst Intern HCL GUVI

- Built Power BI dashboards to analyze employee attrition and workforce productivity using HR datasets.
- Identified key drivers of attrition and delivered actionable insights for decision-making.
- Presented data-driven findings to stakeholders, bridging business and analytics.

ACHIEVEMENTS

Co-ordinator of AI/ML Club Nov 2024 - May 2025
Galgotias Tech Council, Galgotias University

- Led events, workshops, and community initiatives as Club Coordinator, mentoring peers in coding.

Competitive Programming

- 1900+** rating on **LeetCode** and solved **1550+** problems across all platforms
- Achieved a **5 star** on **HackerRank** in **Java** and **Python**

Winner – HackHound 3.0 March 2025
Major League Hackathon
